Adding a **COUGAR® TRUCK VIBRATOR** not only saves you money on costly repairs to your trucks, it increases productivity by eliminating carryback – You gain more payload per cycle which means fewer cycles per job. Fewer cycles give you lower labor and fuel costs and decrease vehicle wear. Material is evenly distributed during spreading. Cougar Truck Vibrators eliminate bed cleanout time and the need for workers to climb into the truck beds to manually remove material, resulting in lower worker's compensation claims.

- Easy, low-cost installation
- Shielded, oversized, permanently-lubricated ball bearings that assure exceptional service life
- Sealed against dirt, dust, and water for long life in extreme conditions
- Small size and light weight with high-speed, low-amp electric motors

Cougar Vibration patented the world's first 12-volt truck vibrator in 1964 and has steadfastly remained focused on industrial vibration. Martin Engineering purchased Cougar in 2010 making Martin the world's leader in industrial vibration.

ELECTRIC MOBILE/TRUCK

DC-3200/-2500/-1100, DC1-400 & DC-200/-80

A complete line of rugged, durable truck vibrators, Cougar 12/24 Volt DC Mobile Vibrators improve the speed and control of material flow from dump trucks and other self-powered heavy equipment. Shielded, oversized, permanently-lubricated ball bearings assure exceptional service life. Sealed against dirt, dust, and water for long life in extreme conditions. Small size and light weight with high speed, low-amp electric motors. Easy, low-cost installation.

DC-3200 /-2500/-1100
12/24 volt DC vibrators ideal for:

- Dump trucks
- Mounted spreaders
- Sanitation, pumper and vacuum trucks

DC1-400
12/24 volt DC vibrator
ideal for:

- Concrete pumps

DC-200/-80
12 volt DC vibrators ideal for:

- ATV or tailgate spreaders
- Mixer truck charge chutes

HYDRAULIC MOBILE/TRUCK VIBRATORS

NHD-110 / HYDRAULIC POWER / ROTATIONAL FORCE

- Strong ductile iron for maximum durability in continuous duty applications.
- Requires minimal maintenance.
- Efficient motor designed for minimal power consumption with low noise output.

PNEUMATIC MOBILE/TRUCK VIBRATORS

5016 / PNEUMATIC POWER / LINEAR FORCE

Options include:

- Internal spring for positive starting
- Manifold/muffler for quiet operation

ATU-43 / PNEUMATIC POWER / ROTATIONAL FORCE

- Optional speed muffler allows precision control of force and speed (regular muffler comes standard).
- Lower air consumption than comparable air vibrator.
- Low 62-78 dBA noise level is well below OSHA standards.
- Excellent power to weight ratio with a 350°F temperature rating.
- Durable anodized aluminum finish provides a tough exterior (paint optional).
- No lubrication required.

AIRMATIC INC founded in 1944, is a woman-owned Industrial Distributor, with installation and maintenance capabilities, offering equipment, machinery, and shop supplies to the Industrial, Construction, Utility, Government, and Commercial Markets. Our products and services are sold through three business units:

The **MATERIALS MANAGEMENT GROUP** provides products and services to industries that convey, store, transport, and process powders and bulk solids from aggregates, cement, and chemicals to foods, grains, metals, power generation, and waste water treatment applications;

The **SERVICE GROUP** provides fabrication, installation, and maintenance services to improve bulk materials handling efficiency; mechanical clean-out services for silos and hoppers to eliminate material flow problems; and shop repair/rebuilding and modifications services of products sold by the Company.

The **TOOL GROUP** provides power tools, personal protective equipment, materials-handling equipment, shop equipment and MRO supplies used for production, fabrication, assembly, metal removal, maintenance, and storage in manufacturing, construction, utility, and commercial applications. Our Customers tell us that by choosing **AIRMATIC** to solve their problems, they gain increased productivity, decreased costs, and a safer, cleaner work environment.

The logo for MARTIN features the word "martin" in a bold, orange, italicized sans-serif font with a registered trademark symbol (®).

MARTIN ENGINEERING is the leading global supplier of system to make the handling of bulk materials cleaner, safer, and more productive. Since its founding in 1944, the company has grown dramatically through the development of solutions to help the solids-handling industries around the world. MARTIN ENGINEERING's success can be attributed to the development of practical, field-proven, cost-effective answers for "real life" problems. MARTIN® Products are designed for tough industrial conditions; they are built to allow easy maintenance; they are engineered for simplicity, cleanliness, safety, and efficiency; they are personalized to meet each customer's unique requirements.
